TRAININGS

30 Days Google Cloud Program

Google Qwiklabs, Online

Oct 2020 - Nov 2020

In 30 days google cloud program we have done training on Cloud Engineering Track and Data Science and Machine Learning Track.

PROJECTS

Sales Management System

Feb 2021 - Apr 2021

I have developed Sales Management System using ASP.NET which have following features:

- 1) Manage manager
- 2) Manage product
- 3) Sales/order report in graphical format
- 4) Manage orders/sales detail
- 5) Login

Farm Crop Management

Jan 2021 - Apr 2021

AgriFarm is mobile application designed to have an effective communication between Farmer and APMC. It will allow farmers to view the crops price, locate

nearest APMC and sell their crops at good price rather than selling to wholesaler.

Analysis of CO2 Emission From Vehicles

Feb 2021 - Apr 2021

Analysis of data is been done in R language.

Online Survey System

Oct 2020 - Nov 2020

This project have been made in HTML, CSS, JSP and MYSQL as a database.

Music Mood Recommendation System

Sep 2020 - Sep 2020

I took part in hackathon organized by College of Engineering, Pune where we have created music mood recommendation using Microsoft Azure for Processing, Training, Testing, Predicting and deploying model to basic website.

Library Management System

Apr 2020 - May 2020

It is a simple project made using java swing to create desktop based application and this project has no database connection.

Bus Booking

Oct 2019 - Nov 2019

This project was made in PHP, HTML, CSS, BOOTSTRAP and MYSQL as Database.
